

## Primate Demonstrates Five Video Technologies at DistribuTECH

*Visualization Software Company Shares Highlights of Upcoming Conference*

**Melbourne, FL** (January 22, 2015) – Primate Technologies, Inc. announces its participation at the 25<sup>th</sup> DistribuTECH Conference & Exhibition, being held at the San Diego Convention Center in San Diego, California on February 3-5, 2015. DistribuTECH is the largest annual transmission and distribution event in the world.

This year, Primate Technologies is co-hosting with rp Visual Solutions of Anaheim, California. Jointly, they will be demonstrating Primate's Situational and Operational Awareness solutions via a large schematic diagram presented across five different video wall technologies using diverse video surfaces and rp Visual Solutions' mounts. The booth will provide customers with a side-by-side comparison of a diverse collection of display wall hardware technologies. [Click here for a sneak peak of the five video technologies demonstration or watch below.](#)

The online display is designed and provided by Primate Technologies. The display demonstrates Situational and Operational Awareness techniques for control rooms by showing examples of aggregated data from diverse systems with animation and alerts for advanced visualization.

Attendees will see Primate's patented SA2™ software that projects dynamic content onto a mapboard and their BlackBoard product using full front projection, as well as tiled LCDs, tiled micro cubes, and the new bright SiliconCore™ direct LED. Each of these video surfaces has a different resolution, allowing real-time, up-close comparison of the benefits of each technology. Primate will demonstrate how operators enhance the video wall with pins and notes applied at the desktop. Primate will also have their new gesture recognition prototype, which allows operators to use hand gestures to navigate desktop displays.

2015 DistribuTECH attendees can witness this one-of-a-kind video wall display in Booths 520 and 521. Primate Technologies will also be providing content to the following booths at the event:

**Primate Technologies, Inc. – Booth 520 / rp Visual Solutions – Booth 521**

**Activu / Mitsubishi – Booth 3523**

- 2 Primate video wall displays (1 schematic and 1 geographic)

**The Control Room Group (AVI/SPL) – Booth 2049**

- 1 Primate video wall display with breaker level details and a high level overview insert

**Planar Systems – Booth 1220**

- 2 Primate video wall displays (1 geographic with pan & zoom capabilities, and 1 schematic display)

**About Primate Technologies, Inc.:** Primate Technologies, Inc., is a visualization software company focused on situational and operational awareness solutions. Primate Technologies has a record of performance for delivering products that exceed industry and regulatory standards including compliance with security requirements.
